

# **Minutes of the Week11 Group Meeting**

Group 7

Monday 22 May 2023

**Chair** Lize Chen

**Members** Qingyan Yang, Yanlin Du, Guochang Chen

**Apologies** None

## **1. Time and Place**

The third group meeting for the MCI Project was held on **zoom meeting at 5:00 pm on Monday 22 May 2023.**

## **2. Quorum Announcement**

The Chairman announced that a quorum of the group was present, and that the meeting, having been duly convened, was ready to proceed with its business.

## **3. Presentation and Assignment of Current Bugs:**

- Bug in Code Conversion: The converted code shows incorrect red indentations when the input content syntax isn't correct. The team needs to work on fixing this issue.
- Conversion Error: If the imported code exceeds 1000 bytes, a conversion error appears. The system should instead disallow conversion for codes exceeding 1000 bytes, and a prompt stating "Exceeds limit, conversion not possible" should appear when the 'Convert' button is clicked. An indication should also be displayed at the bottom, showing something like "1006/1000".
- Export Functionality: Currently, the system allows for export even when the output box is empty. This should not be the case and needs to be fixed.
- Convert Button Functionality: Clicking on the 'Convert' button currently clears the content of the output box. This behavior needs to be addressed.

## **4. Discussion on Client's New Requirements:**

The team acknowledged the complexity of the new client requirements. While we will attempt to address them, if the team encounters any roadblocks, a meeting with the client will be scheduled for further discussion this week.

## **5. Discussion on Project Launch:**

The decision was made not to launch the project at this time.

## **6. Test Plans and Assignments for the Week:**

The main testing will be conducted by Yanlin and Lize. The team needs to classify the testing plans and distribute the work between these two members.

## **7. Next steps:**

Confirm the tasks assigned for this week and the following weeks.

Identify any additional meetings or deliverables needed before the next meeting.
